

ANTI-SLIP

NEW
anti-slip treatment
on location

The ultimate anti-slip solution

Representing Anti-slip in Scandinavia in cooperation with Mulder Montage.

ANTI-SLIP TREATMENT FOR MORE SAFETY

There is an increased risk of slipping for people using escalators and moving walks. To reduce this risk Mulder Montage has developed the ultimate anti-slip treatment.

NEW, ANTI-SLIP TREATMENT ON LOCATION

Applying the anti-slip treatment can be done in the factory but also on location.

This has as advantage:

- No need to disassemble the steps
- No transport costs
- No shut-down time
- Quick and easy

RECOMMENDATIONS

Recommended applications for the anti-slip treatment on escalators and moving walks:

- Located indoors close to exit doors (environmental conditions)
- Located in car parks (wet conditions)
- Outdoor escalator or moving walk (even when covered)

Other applications:

- Landing escalator or moving walk
- Lift cabin floor
- Entrances lifts
- Surfaces with high risk of slipping

Characteristics:

- Tested by TNO
- 7 year guarantee
- Complies with EN-EN115 standards (approved by Liftinstituut)
- Friction rating according DIN51 130: R13

SPECIFICATIONS

Purpose:	Limiting slip hazard for users of moving walks.
Thickness anti-slip layer:	³ 30 µm.
Material:	Silicium Carbonaat Epoxy resin
Location anti-slip layer:	Top of treads
Color anti-slip layer:	Dark grey
Corrosion:	Not
Surface roughness anti-slip layer:	20 µm
Friction rating acc to DIN 51 130 (non-slip > 40 degrees inclination):	R13
Warranty:	7 years, under normal operating conditions.
Life span:	³ 12 years
